

ITEMS YOU SHOULD CONSIDER WHEN REMODELING YOUR HOME

Current statistics show that many American's are choosing to remodel their current home instead of buying a new home and moving.

If you are hiring a contractor to remodel your home, we want to help make the experience a positive one. Here are key items we urge you to consider when making your contractor selection:

- ✓ They should provide a one-year, insurance-backed warranty that backs workmanship and materials, with an optional provision to cover structural components.
- ✓ There should be a written agreement or contract outlining the work to be performed and other project details.
- ✓ They should have valid, current references you can call.

StrucSure's Remodelers Program provides homeowners with coverage options that ease their fears and provides them with peace of mind. Here's what we cover:

- ✓ **Workmanship and materials** are covered up to \$50,000 for one year after the remodeling project is completed*.
- ✓ **Structural** coverage can be added if necessary and provides up to \$20,000 of structural coverage for one year after the remodeling project is completed*.

**Please see Warranty Coverage Booklet for details.*

TOGETHER, WE HAVE YOUR BLUEPRINT FOR SUCCESS!

StrucSure Home Warranty helps you select your contractor with confidence by completing a financial screening and requiring that they meet stringent underwriting requirements. This allows you to focus on your project and feel confident that your remodeler is one of the industry's best!
